Dear Charl, Janine, and Staff,

Thank you so much for giving us a home that we can enjoy with our family and friends. After 45 years with double cavity walls, cement tile roof, awnings outside, foil on the windows, fans in two rooms, "think pink" in the ceiling and split aircon in the main bedroom, together with a giant Jetmaster gas fire place, nothing helped. You came along with your team and personally supervised the job of injecting friendly blown in insulation. Our home is now a place of refuge from the elements. We have to watch TV2 in the mornings to get a weather report in order to dress according for the weather for the day. We, our visitors and grandchildren, visit us in comfort, insulated from extreme weather conditions, as never before. Your product works, and is priced fairly.

Should you ever have a prospective client that is doubtful, please refer them to us. We can fax them, e-mail, or phone them. Also, they can visit our home when there are severe weather conditions. It would be a pleasure to be able to repay you in a small way by promoting your product, personal attention, polite staff, and speedy, tidy installation. The Eskom report that a saving of R 1360.00 to a test home is certainly not a fabrication of the facts. Thank you for giving us a home where we can enjoy our twilight years in comfort.

Yours faithfully,

John and Pauline Ecclestone.

31-05-2008.
